# OBSERVATION

## AERIAL SURVEILLANCE SYSTEM SB4001

The system is an advanced aerial surveillance system, based on lightweight stabilized imaging payloads, mounted on a small and easy to operate tethered helium Aerostats. The system is operational with the military, police and counter terror forces around the world as well as with broadcasting commercial companies.

## MINI TACTICAL UAV SB4002

The system provides comprehensive and effective solution to various scenarios: Urban warfare, Anti terrorism, Strategic installations security, Law enforcement and Military operations, by enabling "over the hill" observation. The Mini Tactical UAV system is completely autonomous from launch to touchdown, with single man operation capability.

UAV Control Panel

## SUB-TACTICAL UAV SB4003

Sub-tactical unmanned aerial vehicle provides:

- Cost-effective intelligence.
- Surveillance and reconnaissance (ISR) capabilities.
- Situational awareness.
- Force protection and security.
- Remote warfare operations.

The Sub-Tactical UAV is equipped with an Electro-optical, day/night, stabilized payload. Its advanced avionics provide a fully manual to fully autonomous flight, combined with surveillance and recognition capabilities. A typically configured, fully fueled Sub-Tactical UAV weighs approx. 45 Kg, carries a mission specific payload of 12 Kg, and cruises at 60-70 Kts. for over 4hr. It can be fitted with a larger fuel tank to facilitate extended flight duration. The system is external-pilot-free. The 2 separate ground control elements (mini-GCS & LRS) as well as a portable video receiving station allow for increased flexibility when deploying and operating the system.

## DEVICE FOR DETECTION OF OPTIC AND OPTOELECTRONIC SYSTEMS SB4101

Detects all existing types of optics: sniper sights, binoculars, night vision, lasers, IR, photo/video and pinhole cameras. Lightweight and portable, they are used for Heads of States/VIP protection, anti-terrorist operations, counter-surveillance/espionage, protection of sensitive areas, buildings, petroleum/chemical facilities, nuclear power plants, airfields, border patrol. # K9 - ATTACK DOGS

**Our attack dogs are trained to work on different kinds of terrain such as buildings, boats, busses, planes, etc. Some of them are dressed to attack any human being present in a searched area and others are trained to attack only the dominant persons (such as hostage taker, terrorist...) in a group of people (following customer's request).**

**Our dogs are also trained to mark people who are unreachable for them, and so, to protect their handler from any potential threat.**
